Did you think my code was clean?
Ah, well I think you code was not bad, but needs some improvement. I know you are learning. I think it is good that you are learning in a way to help understand what our job is.

How did you think I did for not knowing code so much?
I think you did pretty good. I would say keep on practicing you will get it.

Do you have any tips for me?
Ask questions and keep on coding.

Did you think my code was clean?
Not bad. I would double check your code it is a good habit to get into.

How did you think I did for not knowing code so much?
Keep on practicing and you will get better at it and understand. When I started it was hard but as you keep on going it will make more sense to you.

Do you have any tips for me?
Be open to new things and don't worry if you don't get it right for the first time.

Did you think my code was clean?
It was pretty clean. I am glad you are learning how to code. I know that you wanted to learn it for a long time. I am glad that is starting to make sense to you. Doing code is something that you have to keep at it.

How did you think I did for not knowing code so much?
Keep it up and keep working at it.

Do you have any tips for me?
You can always shadow a senior coder that knows what you need to know.

Did you think my code was clean?
Coding is something that your practice and the more you do the more you will learn to love it. I love as I got better at it. So hang in there and everything will be in place.

How did you think I did for not knowing code so much?
Well done, I think you did a nice job. I still think you need to make sure you understand how to place images of where they need to go so you can follow the design if you have one.

Do you have any tips for me?
Practice, practice and more practice.

Did you think my code was clean?
If you are taking a class and I am sure your code is clean as much as your teacher looked at it. You going to have practice and you will get it.  Don't forget to ask a lot of questions and look up things on the web.

How did you think I did for not knowing code so much?
If you felt like you did a good job taking the class then you did.

Do you have any tips for me?
Tips I would say is keep reviewing what you learn and don't lose it. Keep it up and practice each day if you can at least for 10-15 mins. Keep on asking questions.
